19. (canceled)
20. (original) A micromirror projection display comprising:
  - a light source for providing a beam of light along a light path;
  - a first condenser lens on said light path for receiving said beam of light;
  - a filter assembly on said light path for receiving and filtering said beam of light from said first condenser lens;
  - a second condenser lens for receiving said filtered beam of light;
  - a micromirror mounted in a low-cost molded plastic package with built-in printed circuit board base and window for selectively modulating said filtered beam of light;
  - and

a projection lens for receiving said modulated beam of light and focusing said modulated beam of light on an image plane.

21. (currently amended) The micromirror projection display of Claim ~~46~~ 20, wherein said micromirror package contains flex-circuit interconnect cables with built-in connectors.
